Profile

Innovative **Frontend Engineer** with expertise in **React, Javascript/TypeScript, and TailwindCSS**, passionate about delivering scalable, high-performance, and user-centric web applications (PWA/SPA). Skilled in **cloud integration (Firebase)** and **collaborative development with Git**. Experienced in building **real-world client platforms** and **personal innovation projects**, with a proven ability to optimize performance, enhance UX, and ship production-ready applications.

Core Skills

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), TailwindCSS
 - **Architecture & State Mgmt:** Context API, Hooks, REST API integration
 - **Cloud/Backend:** Firebase (Auth, Firestore, Hosting, Functions)
 - **Collaboration & Tools:** Git/GitHub
 - **Strengths:** Performance optimization, UX-focused design, Responsive development
-

Experience

Frontend Developer (Freelance)

Entertainment Platform (b2trendz.com) | OCT 2024 – NOV 2024

- Implemented **responsive, accessible user interfaces** with **React and TailwindCSS**, ensuring consistent performance across devices.
 - Integrated external APIs to dynamically fetch and display content, improving user engagement.
 - Developed reusable components and modular layouts, improving code maintainability and scalability.
 - Collaborated with the product team to refine UI/UX, resulting in a **more intuitive user journey**.
Tech Stack: React, JavaScript, TailwindCSS
-

Frontend Developer (Freelance)

KINNEX LTD. Investment Platform (Kinnex.com) | June 2025 – Aug 2025

- Designed and developed the **entire investment platform** independently, from UI to backend integration.

- Implemented **Firestore Authentication** for secure user registration/login and Firestore for real-time data management.
 - Integrated **Paystack payment gateway**, enabling seamless and secure transactions.
 - Built a **responsive, scalable dashboard** with React + TailwindCSS to visualize user investments and returns.
 - Ensured performance and reliability, delivering a production-ready platform used by live clients.
- Tech Stack:** React, JavaScript, TailwindCSS, Firebase, Paystack
-

Projects

StudyVerse-Connect (Hackathon Project – Solo) [Study-verse-connect.vercel.app](https://study-verse-connect.vercel.app)

- Built a **full-stack web application** that connects students for real-time collaboration and tutoring.
- Implemented **Firestore backend** for authentication, data storage, and real-time updates.
- Integrated **Cohere AI API** to provide an **AI-powered tutoring assistant**, helping students answer questions instantly.
- Developed **real-time chat functionality** for seamless peer-to-peer student interaction.
- Delivered a production-ready MVP within hackathon constraints, demonstrating speed and technical versatility.

Tech Stack: React, JavaScript, TailwindCSS, Firebase, Cohere API

E-Commerce Website (Personal Project)

- Designed and developed a fully functional **e-commerce website** using **React** with **LocalStorage API** for handling cart data, user registration, and session persistence.
- Implemented core features: product listing, add-to-cart, checkout simulation, and user login system.
- Focused on **UI/UX design** with **TailwindCSS**, ensuring a clean and responsive shopping experience.
- Demonstrated ability to build backend-like functionality using only frontend technologies.

Tech Stack: React, JavaScript, TailwindCSS, LocalStorage API

Additional Highlights

- Strong foundation in **scalable UI development** for enterprise-grade applications.
- Experienced in **Agile delivery cycles**, sprint planning, and code reviews
